

Catch::Matchers::Impl
::MatcherUntypedBase

Catch::Matchers::Impl
::MatcherMethod< T >

Catch::Matchers::Impl
::MatcherBase< T >

```
graph LR; A[Catch::Matchers::Impl< T >] --> B[Catch::Matchers::Impl< MatcherUntypedBase >]; A --> C[Catch::Matchers::Impl< MatcherMethod< T > >];
```

The diagram illustrates the class hierarchy for Catch2 matchers. A central gray box on the right, labeled 'Catch::Matchers::Impl< T >', has two blue arrows pointing left to two white boxes. The top white box is labeled 'Catch::Matchers::Impl< MatcherUntypedBase >' and the bottom white box is labeled 'Catch::Matchers::Impl< MatcherMethod< T > >'. This indicates that the generic matcher base class inherits from both the untyped base and the templated method base.
